

Choose a word from the word bank to complete each sentence. Words will be used more than once.

1. A quadrilateral with two pairs of parallel sides is a _____
2. The opposite **sides** of a parallelogram are _____
3. The opposite **angles** of a parallelogram are _____
4. The consecutive **angles** of a parallelogram are _____
5. The **diagonals** of a parallelogram _____ each other.

parallelogram
congruent
supplementary
bisect

Use parallelogram MATH to answer #6-8.

6. Name **two pairs** of congruent angles. $\angle M + \angle T$ and _____
7. Name **four pairs** of supplementary angles. _____, _____, _____ and _____
8. Name **two pairs** of congruent segments. _____ and _____

*Note:
Each line
is a pair. See
example!

Find the missing angles and sides. Label them ON THE PICTURES.

Use parallelogram ABCD to answer the following questions.

13. If $DX = 4$ and $AX = 6$ find:

$BX = \underline{\hspace{2cm}}$ $BD = \underline{\hspace{2cm}}$

$XC = \underline{\hspace{2cm}}$ $AC = \underline{\hspace{2cm}}$

14. If $m\angle ABC = 120^\circ$, find:

$m\angle ADC = \underline{\hspace{2cm}}$ $m\angle DAB = \underline{\hspace{2cm}}$

$m\angle 1 = \underline{\hspace{2cm}}$ $m\angle 2 = \underline{\hspace{2cm}}$

$m\angle 3 = \underline{\hspace{2cm}}$ $m\angle 4 = \underline{\hspace{2cm}}$

Using the properties of parallelograms, write and solve an algebraic equation for each picture.

15.

16.

17.

Relationship: *congruent or supplementary*

Equation:

Relationship: *congruent or supplementary*

Equation:

Relationship: *congruent or supplementary*

Equation:

$x = \underline{\hspace{2cm}}$

$x = \underline{\hspace{2cm}}$

$x = \underline{\hspace{2cm}}$
